Control a 3-zone bar from an iPhone

Control the pub sound system on the manager's smartphone. Any employee given the right URL and password can access controls from any web browser. No app required.

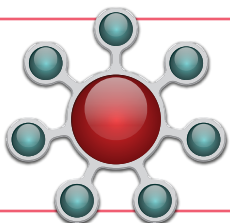

Smartphone controls simplify the operation of a sound system. Names, colors, layout and sizes are easily customized in Halogen software. Even the bar logo is there. Templates for most popular phones and tablets help design appropriate control screens for your device.

If you want to make access easier, Halogen generates a QR code. This QR code takes you to more details on this “Bar with 3 Zones” system in our “Applications” section, along with a downloadable Halogen configuration file to see how it works.

Simple to program; simple to use.
